Zipphy

Cognitive Document Processing

Classify, Index, Split & Validate documents

Major challenges faced by the industry today

84%

Time spent in document classification and splitting

44%

Businesses expecting straight through processing

\$62B

Lost annually due to inaccurate document capture

Introducing Zipphy Platform

A DIY/No-Code platform to automate document classification, indexing, splitting and validation across business process flows

Design document models and deploy in **5 minutes**

An **API first** architecture to integrate with your existing system

Human in the loop quality control and training

Prebuilt classification and splitter API for generic business process across industry (Loan Processing, KYC, Insurance claim, etc.)

Zipphy Technologies

Computer Vision

Natural Language Processing

Machine Learning

Optical Character Recognition

Neural Networks

How Zipphy Platform Works?

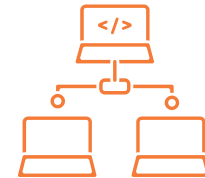

Design Document Model

Using 5 sample documents generate ML Model , add text rules (optional) to build document model with Designer tool.

Design API

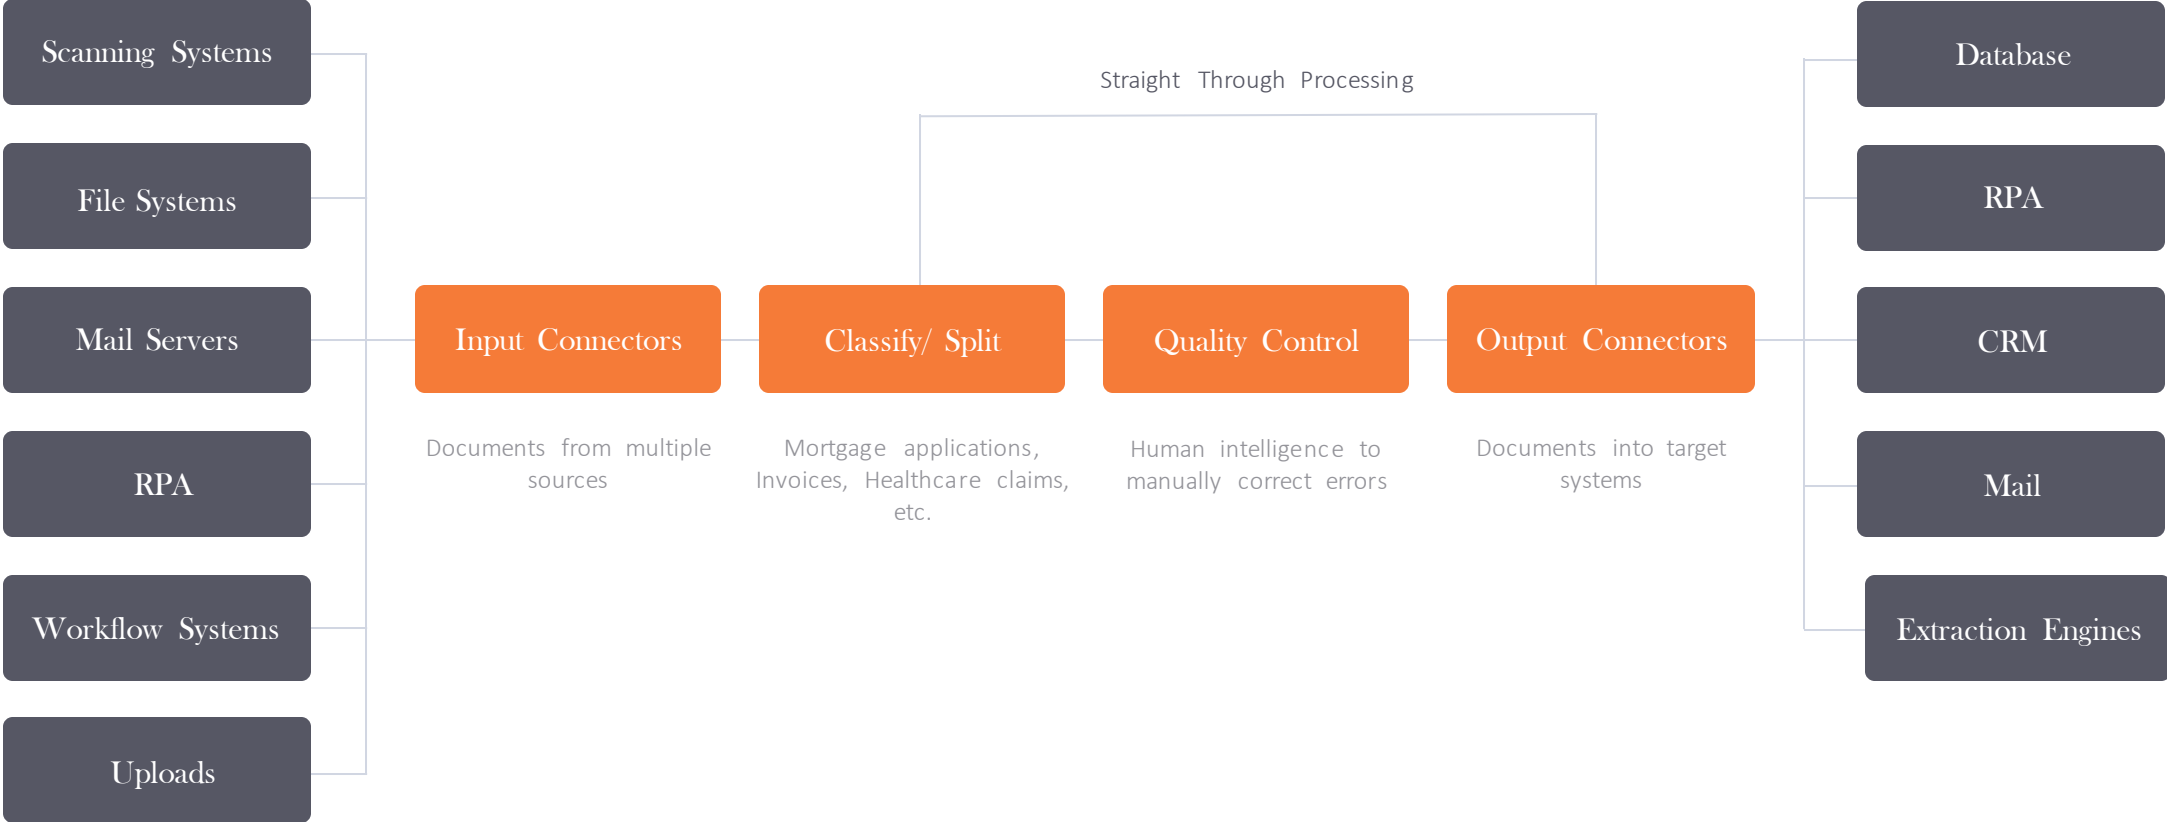

Design Splitter and Classification API for each workflow process in the organization.

Deploy and Run at Scale

Deploy API and run as micro services or deploy on Zipphy runtime environment to process incoming documents

Zipphy Platform Overview

Zipphy Document Splitter

Zipphy Document Splitter helps in identifying documents of interest, extraction and Labelling from a large set of scanned documents.

1. Identify document boundaries seamlessly
2. Splitting by patch sheet separation
3. Splitting large documents
4. Extracting documents of interest
5. Split multiple instances of the same document type

Zipphy Document Classification

Zipphy Document Classification helps in Identifying, Labelling and auditing documents across business processes.

1. Assign document type labels to documents
2. Automatically classify and separate documents
3. Human validation and correction for low confidence documents
4. Group document types per department and use cases in the organisation.

Competitive Advantage

- ★ Industry specific pre-built document types
- ★ No code, DIY Modelling for custom document types
- ★ API first product
- ★ SaaS OR On premise
- ★ Manage document types on the fly
- ★ Designed for the future

Zipphy POC Kickstarter

01

Go Live Within 20 Days

Use prebuilt models and train custom models quickly using the designer tools to fit your document processing requirements.

02

Headless Runtime

Deployed classification and splitter models as APIs, Seamlessly integrate with existing systems.

03

Streamline QA Processes

Human in the loop for validation to ensure 100% accuracy.

At the end of 20 days

- ★ POC readout and final demo
- ★ Access to Zipphy Platform (Try & Buy)
- ★ Validation with POC success metrics
- ★ Discuss next steps

Zipphy Document Processing Used Across Industries

Government

Insurance

Logistics

Mortgage

Procurement

Financial Institutions
